

## PETROBUILD 1000L CUBE DIESEL TANK

## Technical Data Sheet

## Product Overview

The Petrobuild 2500 Litre Cube Diesel Tank is a heavy-duty, transportable, and fully bunded fuel storage solution designed for safe diesel storage and dispensing in demanding industrial environments. With its reinforced cube structure and increased capacity, it is ideal for high-consumption operations requiring reliable, compliant, and space-efficient fuel storage.

|                        |                                  |
|------------------------|----------------------------------|
| Fuel Type              | Diesel                           |
| Gross Capacity         | 2,557 Litres                     |
| Safe Fill Capacity     | 2,500 Litres                     |
| Tank Type              | Double-wall (bunded)             |
| Inner Tank Thickness   | 3 mm steel                       |
| Outer Tank Thickness   | 3 mm steel                       |
| Total Mass (Empty)     | ±1,300 kg (approx. from drawing) |
| Design Standard        | AS1940                           |
| Manufacturing Standard | AS1692                           |
| Hydrostatic Test       | Gross level +150 mm              |

#### Design Features

- Double-Wall Construction
- Provides integrated spill containment and environmental protection.
- Heavy-Duty Steel Fabrication
- Engineered for durability in harsh operating conditions.
- Cube Form Factor
- Optimized for transport, stacking, and space efficiency.
- Lockable Equipment Hatch
- Secure top access for pump and dispensing equipment.
- Forklift Pockets & Lifting Points
- Enables easy handling, relocation, and deployment on-site.
- Integrated Equipment Compartment
- Houses pumps, meters, and fittings safely within the tank footprint.

| Dimension | Size    |
|-----------|---------|
| Length    | 1690 mm |
| Width     | 2290 mm |
| Height    | 1281 mm |

(Final dimensions may vary slightly depending on fittings and configuration.)

#### Applications

- Construction sites
- Mining operations
- Agriculture & farming
- Fleet refueling
- Backup fuel storage

#### Compliance & Safety

- Designed in accordance with AS1940 (flammable and combustible liquids storage)
- Manufactured to AS1692 standards
- Fully bunded for environmental protection
- Suitable for safe transport and on-site fuel management

#### Optional Equipment (Typical)

- 12V / 24V / 220V pump systems
- Flow meter
- Automatic nozzle
- Fuel management system integration
- Filtration systems
