

T38 Self-Bunded Diesel Storage Tank

The T38 is a large-capacity, containerised self-bunded diesel storage tank designed for bulk fuel storage in demanding environments. Its double-wall steel construction provides integrated secondary containment, eliminating the need for external bunding while ensuring safe and environmentally compliant fuel storage.

The no pump bay configuration allows the tank to be used for bulk storage applications where dispensing equipment may be installed externally or integrated into a centralised fuel management system.

Specification	T38 — No Pump Bay Model
Gross Capacity	38,250 Litres
Safe Fill Capacity	35,380 Litres
Tank Type	Self Bunded (Double Wall Steel Tank)
Configuration	Containerised — No Pump Bay
Weight (Empty)	6,280 kg
Length	6,058 mm
Width	2,438 mm
Height	2,896 mm

STANDARD CONSTRUCTION

- DOUBLE-WALL STEEL CONSTRUCTION
- INNER TANK THICKNESS: 5 MM
- OUTER TANK THICKNESS: 5 MM
- MANUFACTURED IN ACCORDANCE WITH UL142 / AS1692 / AS1940 STANDARDS (OR EQUIVALENT)
- INDUSTRIAL-GRADE CORROSION PROTECTION COATING
- CONTAINERISED FORMAT FOR EFFICIENT TRANSPORT AND INSTALLATION

EQUIPMENT

- FILL POINT WITH CAMLOCK COUPLING
- VENT PIPE WITH WEATHERPROOF CAP
- EMERGENCY PRESSURE RELIEF VENT
- DIPSTICK OR MECHANICAL LEVEL GAUGE
- OVERFILL PREVENTION PROVISION
- EARTHING/GROUNDING POINT
- FORKLIFT POCKETS AND LIFTING LUGS
